1: Introduction

CIPFA Treasury Management in the Public Services: Code of Practice and Cross Sectoral Guidance Notes

CIPFA has defined treasury management as “the management of the organisation’s investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.”

The Council has adopted CIPFA’s Treasury Management in the Public Services: Code of Practice and Cross Sectoral Guidance Notes (the Treasury Code).

CIPFA Prudential Code for Capital Finance in Local Authorities

The CIPFA Prudential Code for Capital Finance in Local Authorities (the Prudential Code) is a professional code of practice. Local authorities have a statutory requirement to comply with the Prudential Code when making capital investment decisions and carrying out their duties under Part 1 of the Local Government Act 2003 (Capital Finance etc and Accounts).

The CIPFA Prudential Code sets out the manner in which capital spending plans should be considered and approved, and in conjunction with this, the requirement for an integrated treasury management strategy.

Councils are required to set and monitor a range of prudential indicators for capital finance, covering affordability, prudence, capital expenditure, external debt and treasury management, as well as a range of treasury indicators.

Treasury Management Policy Statement

The Council’s Treasury Management Policy Statement is included in Appendix 2. The policy statement follows the wording recommended by the latest edition of the CIPFA Treasury Code.

Treasury Management Practices

The Council’s Treasury Management Practices (TMPs) set out the manner in which the Council will seek to achieve its treasury management policies and objectives, and how it will manage and control those activities.

The Council’s TMPs Schedules cover the detail of how the Council will apply the TMP Main Principles in carrying out its operational treasury activities. They are reviewed annually and approved by the Council’s Chief Finance Officer.

The Treasury Management Strategy

It is a requirement under the Treasury Code to produce an annual strategy report on proposed treasury management activities for the year.

The Council's Treasury Management Strategy is drafted in the context of the key principles of the Treasury Code, as follows:

- Public service organisations should put in place formal and comprehensive objectives, policies and practices, strategies and reporting arrangements for the effective management and control of their treasury management activities.
- Their policies and practices should make clear that the effective management and control of risk are prime objectives of their treasury management activities and that responsibility for these lies clearly within their organisations. Their appetite for risk should form part of their annual strategy, including any use of financial instruments for the prudent management of those risks, and should ensure that priority is given to security and liquidity when investing funds.
- They should acknowledge that the pursuit of value for money in treasury management, and the use of suitable performance measures, are valid and important tools for responsible organisations to employ in support of their business and service objectives; and that within the context of effective risk management, their treasury management policies and practices should reflect this.

The purpose of the Treasury Management Strategy is to establish the framework for the effective and efficient management of the Council's treasury management activity, including the Council's investment portfolio, within legislative,

regulatory, and best practice regimes, and balancing risk against reward in the best interests of stewardship of the public purse.

The Treasury Management Strategy incorporates:

- The Council's capital financing and borrowing strategy for the coming year
- The Council's policy on the making of Minimum Revenue Provision (MRP) for the repayment of debt, as required by the Local Authorities (Capital Finance & Accounting) (Amendments) (England) Regulations 2008.
- The Affordable Borrowing Limit as required by the Local Government Act 2003.
- The Annual Investment Strategy for the coming year as required by the CLG revised Guidance on Local Government Investments issued in 2010.

The strategy takes into account the impact of the Council's Medium Term Financial Plan, its revenue budget and capital programme, the balance sheet position and the outlook for interest rates.

The Treasury Management Strategy for 2015-16 also includes the Council's:

- Policy on borrowing in advance of need
- Counterparty creditworthiness policies

The main changes from the Treasury Management Strategy adopted in 2014-15 are:

- Updates to interest rate forecasts
- Updates to debt financing budget forecasts
- Updates to Prudential and Treasury Indicators

The Council regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. The Treasury Management Scheme of Delegation is shown in Appendix 1.

2: Current Treasury Management position

The Council's projected treasury portfolio position at 31 March 2015, with forward estimates is summarised below. The table shows the actual external borrowing (the treasury management operations), against the capital borrowing need (the Capital Financing Requirement - CFR), highlighting any over or under borrowing.

£m	2014-15 Projected	2015-16 Estimate	2016-17 Estimate	2017-18 Estimate	2018-19 Estimate	2019-20 Estimate
External borrowing						
Borrowing at 1 April	381.1	395.4	463.5	473.4	469.5	455.9
Expected change in borrowing	14.3	68.1	9.9	-3.9	-13.7	-15.3
Actual borrowing at 31 March	395.4	463.5	473.4	469.5	455.9	440.5
CFR – the borrowing need	532.1	600.3	610.2	606.3	592.6	577.3
Under/(over) borrowing	136.7	136.8	136.8	136.8	136.8	136.8
Total investments at 31 March						
Investments	15.8	10.6	14.7	20.3	21.6	21.9
Investment change	-28.1	-5.2	4.1	5.6	1.3	0.3
Net borrowing	379.6	452.9	458.7	449.2	434.3	418.6

Within the set of prudential indicators there are a number of key indicators to ensure that the Council operates its activities within well defined limits. One of these is that the Council needs to ensure that its gross borrowing does not, except in the short term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for current and next two financial years. This allows some flexibility for limited early borrowing for future years, but ensures that borrowing is not undertaken for revenue purposes except to cover short term cash flows.

The Chief Finance Officer (Section 151 Officer) reports that the Council complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes into account current commitments, existing plans, and the proposals in this budget report.

3: Prospects for interest rates

The Council has appointed Capita Asset Services (CAS) as its treasury advisor and part of their service is to assist the Council to formulate a view on interest rates. The following graph gives the CAS central view for short term (Bank Rate) and longer fixed interest rates.

Until 2013, the economic recovery in the UK since 2008 had been the worst and slowest recovery in recent history. However, growth has rebounded during 2013 and especially during 2014, to surpass all expectations, propelled by recovery in consumer spending and the housing market. Forward surveys are also currently very positive in indicating that growth prospects are strong for 2015, particularly in the services and construction sectors. However, growth in the manufacturing sector and in exports has weakened during 2014 due to poor growth in the Eurozone.

There does need to be a significant rebalancing of the economy away from consumer spending to manufacturing, business investment and exporting in order for this initial stage in the recovery to become more firmly established. One drag on the economy is that wage inflation has been lower than CPI inflation so eroding disposable income and living standards, although income tax cuts have ameliorated this to some extent. This therefore means that labour productivity must improve significantly for this situation to be corrected by warranting increases in pay rates. In addition, the encouraging rate at which unemployment has been falling must eventually feed through into pressure for wage increases, though current views on the amount of hidden slack in the labour market probably means that this is unlikely to happen in the near future. The US, the main world economy, faces similar debt problems to the UK, but thanks to reasonable growth, cuts in government expenditure and tax rises, the annual government deficit has been halved from its peak without appearing to do too much damage to growth.

This challenging and uncertain economic outlook has several key treasury management implications:

- As for the Eurozone, concerns in respect of a major crisis subsided considerably in 2013. However, the downturn in growth and inflation during the second half of 2014, and worries over the Ukraine situation, Middle East and Ebola, have led to a resurgence of those concerns as risks increase that it could be heading into deflation and a triple dip recession since 2008. Sovereign debt difficulties have not gone away and major concerns could return in respect of individual countries that do not dynamically address fundamental issues of low growth, international uncompetitiveness and the need for overdue reforms of the economy (as Ireland has done). It is, therefore, possible over the next few years that levels of government debt to GDP ratios could continue to rise to levels that could result in a loss of investor confidence in the financial viability of such countries. Counterparty risks therefore remain elevated. This continues to suggest the use of higher quality counterparties for shorter time periods.
- Investment returns are likely to remain relatively low during 2015-16 and beyond.
- Borrowing interest rates have been volatile during 2014 as alternating bouts of good and bad news have promoted optimism, and then pessimism, in financial markets. During July to October 2014, a building accumulation of negative news has led to an overall trend of falling rates. The policy of avoiding new borrowing by running down spare cash balances has

served well over the last few years. However, this needs to be carefully reviewed to avoid incurring higher borrowing costs in later times, when authorities will not be able to avoid new borrowing to finance new capital expenditure and/or to refinance maturing debt.

- There will remain a cost of carry to any new borrowing which causes an increase in investments as this will incur a revenue loss between borrowing costs and investment returns.

4: Borrowing strategy

The overarching objectives for the borrowing strategy are as follows:

- To manage the Council's debt maturity profile, leaving no one future year with a disproportionate level of repayments.
- To maintain a view on current and possible future interest rate movements, and to plan borrowing accordingly.
- To monitor and review the balance between fixed and variable rate loans against the background of interest rates and the Prudential Indicators
- Reduce reliance on the PWLB as a source of funding and review all alternative options available, including forward loan agreements.

- Support the LGA Bond Agency that the Council has invested in.
- Provide value for money and savings where possible to meet budgetary pressures.

The Council is currently maintaining an under borrowed position. This means that the capital borrowing need (the Capital Financing Requirement) has not been fully funded with loan debt as cash supporting the Council's reserves, balances, and cash flow, has been used as a temporary measure. This strategy is prudent as investment returns are low and counterparty risk is quite high.

Against this background and the risks within the economic forecast, caution will be adopted with the 2015-16 treasury operations. The Chief Finance Officer will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances.

Given that projections over the next three years show an increasing CFR and Bank Rate is expected to remain low, the Council will continue to use a mix of its own cash balances, short term borrowing and long term borrowing to finance further capital expenditure. This strategy maximises short term savings.

However, the decision to maintain internal borrowing to generate short term savings will be evaluated against the potential for incurring additional long term borrowing costs in later years, when long term interest rates are forecast to be significantly higher.

It is budgeted that £67.5m of new long term borrowing is undertaken to finance further capital expenditure. A proportion of this borrowing will be from the newly formed Bonds Agency when it is expected to issue its first bonds during 2015-16. The Council is also exploring the possibility of arranging loans now for advance in up to 5 years time. This provides certainty in future interest costs and reduces the risk that loans may have to be raised in the future at a higher interest rate than is forecast.

Prudential & Treasury Indicators

There is a requirement under the Local Government Act 2003 for local authorities to have regard to CIPFA's Prudential Code for Capital Finance in Local Authorities (the "CIPFA Prudential Code") when setting and reviewing their prudential indicators. It should be noted that CIPFA undertook a review of the Code in early 2008 with a fully revised version being published in 2009 to incorporate changes towards implementing International Financial Reporting Standards (IFRS).

A full set of prudential indicators and borrowing limits are shown in Appendix 3.

Policy on borrowing in advance of need

The Council will not borrow more than, or in advance of, its needs purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within the forward approved Capital Financing Requirement estimates, and will be considered carefully to ensure that

value for money can be demonstrated and that the Council can ensure the security of such funds.

Borrowing in advance will be made within the following constraints:

Year	Max. Borrowing in advance	Notes
2015-16	100%	Borrowing in advance will be limited to no more than the expected increase in borrowing need (CFR) over the period of the approved Medium Term Capital Programme, a maximum of 3 years in advance.
2016-17	50%	
2017-18	25%	

Risks associated with any borrowing in advance activity will be subject to prior appraisal and subsequent reporting through the Councils reporting mechanism for treasury management and capital financing matters.

Debt rescheduling

As short term borrowing rates will be considerably cheaper than longer term fixed interest rates, there may be potential opportunities to generate savings by switching from long term borrowing to short term borrowing. However, these savings will need to be considered in the light of the current treasury position and the size of the cost/benefit of any debt repayment (premiums and discounts included).

The reasons for any rescheduling to take place will include:

- The generation of cash savings and/or discounted cash flow savings.

- Helping to fulfil the treasury strategy.
- Enhancing the balance of the portfolio (amend the maturity profile and/or the balance of volatility).

Consideration will also be given to identifying whether there is any residual potential for making savings by running down investment balances to repay debt prematurely as short term rates on investments are likely to be lower than rates paid on current debt.

All rescheduling will be reported to the General Purposes Committee (GPC), at the next quarterly report following its action.

5: Minimum Revenue Provision

The Council is required to repay an element of the accumulated General Fund capital spend each year (the CFR) through a revenue charge (the Minimum Revenue Provision - MRP), although it is also allowed to undertake additional voluntary payments if required (Voluntary Revenue Provision - VRP).

CLG Regulations have been issued which require the full Council to approve an MRP Statement in advance of each year. A variety of options are provided to councils, so long as there is a prudent provision. The Council is recommended to approve the MRP Policy in Appendix 4.

The Council, in conjunction with its Treasury Management advisors, has considered the MRP policy to be prudent.

6: Investment strategy

Government Guidance on Local Government Investments in England requires that an Annual Investment Strategy (AIS) be set. The Guidance permits the Treasury Management Strategy Statement (TMSS) and the AIS to be combined into one document.

The Council's general policy objective is to invest its surplus funds prudently. Due to the ongoing uncertainty in the banking sector which has seen institutions fold, it is now felt more appropriate to focus on the safe return of the sum invested. As such the Council's investment priorities in priority order are:

- the security of the invested capital
- the liquidity of the invested capital
- the yield received from the investment

A copy of the Council's Annual Investment Strategy is shown in Appendix 5.

7: Sensitivity of Forecast and Risk Analysis

Risk Management

The Council regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Treasury management risks are identified in the Council's approved Treasury Management Practices. The main risks to the treasury activities are:

- Credit and counterparty risk (security of investments)
- Liquidity risk (adequacy of cash resources)
- Interest rate risk (fluctuations in interest rate levels)
- Exchange rate risk (fluctuations in exchange rates)
- Refinancing risks (impact of debt maturing in future years)
- Legal and regulatory risk (non-compliance with statutory and regulatory requirements)
- Fraud, error and corruption, and contingency management (in normal and business continuity situations)
- Market risk (fluctuations in the value of principal sums)

The TMP Schedules set out the ways in which the Council seeks to mitigate these risks. Examples are the segregation of duties (to counter fraud, error and corruption), and the use of creditworthiness criteria and counterparty limits (to minimise credit and counterparty risk). Council officers, in conjunction with the treasury advisers, will monitor these risks closely.

Sensitivity of the Forecast

The sensitivity of the forecast is linked primarily to movements in interest rates and in cash balances, both of which can be volatile. Interest rates in particular are subject to global external influences over which the Council has no control. In terms of interest rates, with the forecast average investment portfolio of £45m for 2015-16, each 0.1% increase or

decrease in investment rates equates to £45k, the revenue impact.

Both interest rates and cash balances will be monitored closely throughout the year and potential impacts on the Council's debt financing budget will be assessed. Action will be taken as appropriate, within the limits of the TMP Schedules and the treasury strategy, and in line with the Council's risk appetite, to keep negative variations to a minimum. Any significant variations will be reported to GPC as part of the Council's regular budget monitoring arrangements.

8: Reporting arrangements

In line with Code full Council is required to receive and approve, as a minimum, three main reports each year, which incorporate a variety of policies, estimates and actuals. These reports are:

a) Annual Treasury Management Strategy

- the capital plans (including prudential indicators);
- a Minimum Revenue Provision Policy (how residual capital expenditure is charged to revenue over time);
- the Treasury Management Strategy (how the investments and borrowings are to be organised) including treasury indicators; and
- an investment strategy (the parameters on how investments are to be managed).

b) Treasury Management Mid Year Report

This will update members with the progress of the capital position, amending prudential indicators as necessary, and indicating whether the agreed treasury strategy is meeting the Council's stated capital financing objectives, or whether any policies require revision.

c) Treasury Management Outturn Report

This provides details of a selection of actual prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy.

In addition, GPC will receive quarterly **Monitoring Reports**. The second and fourth quarter report will go to full Council as described above. The quarterly reports will be subject to the Council's Scrutiny process.

9: Treasury Management budget

The table below provides a breakdown of the treasury management budget.

	2015-16 £m	2016-17 £m	2017-18 £m	2018-19 £m	2019-20 £m
Interest payable	17.849	19.549	19.687	19.257	18.548
MRP	18.591	21.539	22.296	22.551	22.445
Interest receivable	-0.319	-0.609	-1.009	-1.174	-1.323
Internal Interest (net)	0.325	0.645	1.012	1.165	1.318
Debt Management Expenses	0.100	0.100	0.100	0.100	0.100
Technical & Other	-0.085	-0.085	-0.085	0.165	0.165
Total	36.460	41.139	42.001	42.064	41.254

Assumptions behind the 2015-16 budget:

- Average rates achievable on investments will be 0.7%.
- New borrowing to fund the capital programme will be financed by long term borrowing at a rate of 4.5%.
- Replacement borrowing will be taken out at the long term borrowing rate of 4.5% as it matures.
- The MRP charge is in line with the Council's MRP policy.

10: Policy on the use of external service providers

The Council uses CAS as its external treasury management advisors.

The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon our external service providers.

It also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources. The Council will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented, and subjected to regular review.

11: Future developments

Local Authorities are having to consider innovative strategies towards improving service provision to their communities. This approach to innovation also applies to councils' treasury management activities. The Government is introducing new statutory powers and policy change which will have an impact on treasury management approaches in the future. Examples of such changes are:

a) Localism Act

A key element of the Act is the "General Power of Competence": "A local authority has power to do anything that individuals generally may do." The Act opens up the

possibility that a local authority can use derivatives as part of their treasury management operations. However the legality of this has not yet been tested in the courts even though CIPFA have set out a framework of principles of the use of derivatives in the Treasury Management Code and guidance notes. The Council has no plans at this point to use financial derivatives under the powers contained within this Act.

b) Loans to Third Parties

The Council may borrow to make grants or loans available to third parties for the purpose of capital expenditure, as allowable under paragraph 25 (1) (b) of the Local Authorities (Capital Financing and Accounting) (England) Regulations 2003 (Statutory Instrument No. 3146). This will usually be to support economic development, and maybe funded by external borrowing.

c) Municipal Bond Agency

The Council is currently working with the Local Government Association (LGA) and a number of other local authorities to explore the possibility of establishing a collective agency to issue bonds in the capital markets. Further developments will be provided in the Treasury Management Quarterly update reports throughout the year.

12: Training

A key outcome of investigations into local authority investments following the credit crisis has been an emphasis on the need to ensure appropriate training and knowledge in relation to treasury management activities, for officers

employed by the Council, in particular treasury management staff, and for members charged with governance of the treasury management function

Capita Asset Services run regular training events which are attended by the Treasury Team. In addition, members of the team attend national forums and practitioner user groups.

Treasury Management training for committee members will be delivered as required to facilitate informed decision making and challenge processes. A training session for Councillors was held on the 12th December 2014.

13: List of appendices

- Appendix 1: Treasury Management Scheme of Delegation and Role of Section 151 Officer
- Appendix 2: Treasury Management Policy Statement
- Appendix 3: Prudential and Treasury Indicators
- Appendix 4: Minimum Revenue Provision (MRP) Policy Statement
- Appendix 5: Annual Investment Strategy

Appendix 1: Treasury Management Scheme of Delegation and role of the Section 151 Officer

The Scheme of Delegation

Full Council

Approval of annual strategy and mid-year update to the strategy.
Approval of the annual Treasury Management report.
Approval of the Treasury Management budget.

General Purposes Committee

Approval of the Treasury Management quarterly update reports.
Approval of the Treasury Management outturn report.

Scrutiny Committee

Scrutiny of performance against the Strategy.

The Treasury Management role of the Section 151 Officer

The S151 (responsible) officer:

- Recommends clauses, Treasury Management policy/practices for approval, reviewing the same regularly, and monitoring compliance.
- Submits regular Treasury Management policy reports.
- Submits budgets and budget variations.
- Receives and reviews management information reports.
- Reviews the performance of the Treasury Management function.

- Ensures the adequacy of Treasury Management resources and skills, and the effective division of responsibilities within the Treasury Management function.
- Ensures the adequacy of internal audit, and liaising with external audit.
- Recommends the appointment of external service providers.

Appendix 2: Treasury Management Policy Statement

This organisation defines its treasury management activities as:

“The management of the organisation’s investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.”

This organisation regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the organisation, and any financial instruments entered into to manage these risks.

This organisation acknowledges that effective treasury management will provide support towards the achievement of its business and service objectives. It is therefore committed to the principles of achieving value for money in treasury management, and to employing suitable comprehensive performance measurement techniques, within the context of effective risk management

Appendix 3: Prudential and Treasury Indicators

1: The Capital Prudential Indicators

The Council's capital expenditure plans are the key driver of Treasury Management activity. The output of the capital expenditure plans is reflected in prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans.

Capital expenditure. This prudential indicator shows the Council's capital expenditure plans; both those agreed previously, and those forming part of this budget cycle. Capital expenditure excludes spend on Private Finance Initiatives (PFI) and leasing arrangements, which are now shown on the balance sheet.

The table below summarises the capital expenditure plans and how these plans are being financed by capital or revenue resources. Any shortfall of resources results in a funding need (borrowing).

Capital Expenditure £m	2014-15 Projected	2015-16 Estimate	2016-17 Estimate	2017-18 Estimate	2018-19 Estimate	2019-20 Estimate
Capital Expenditure	142.6	218.7	161.9	122.5	96.7	77.0
Financed by:						
Capital receipts	6.2	4.5	29.1	6.3	5.7	4.6
Capital grants	59.4	63.0	62.9	61.1	58.3	53.7
Capital contributions	25.7	64.4	38.5	36.7	23.8	11.6
Other adjustments	-	-	-	-	-	-
Net financing need for the year	51.3	86.8	31.4	18.4	8.9	7.1

The Council's borrowing need (the Capital Financing Requirement). The second prudential indicator is the Council's Capital Financing Requirement (CFR). The CFR is the total historical outstanding capital expenditure which has not yet been paid for from either revenue or capital resources. It is a measure of the Council's underlying borrowing need. Any capital expenditure above, which has not immediately been paid for, will increase the CFR.

Following accounting changes the CFR includes any other long term liabilities (e.g. PFI schemes, finance leases) brought onto the balance sheet. Whilst this increases the CFR, and therefore the Council's borrowing requirement, these types of scheme include a borrowing facility and so the Council is not required to separately borrow for these schemes. The CFR below is shown net of these liabilities.

Capital Financing Requirement £m	2014-15 Projected	2015-16 Estimate	2016-17 Estimate	2017-18 Estimate	2018-19 Estimate	2019-20 Estimate
Capital Financing Requirement						
Total CFR	532.1	600.3	610.2	606.3	592.6	577.3
Movement in CFR	34.2	68.2	9.9	-3.9	-13.7	-15.3
Movement in CFR represented by						
Net financing need for the year (above)	51.3	86.8	31.4	18.4	8.9	7.1
Less MRP and other financing movements	17.1	18.6	21.5	22.3	22.6	22.4
Movement in CFR	34.2	68.2	9.9	-3.9	-13.7	-15.3

The operational boundary. This is the limit beyond which external borrowing is not normally expected to exceed. All things being equal, this could be a similar figure to the CFR, but may be lower or higher depending on the levels of actual borrowing undertaken as impacted by the level of current and future cash resources and the shape of the interest rate yield curve.

Operational Boundary £m	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20
Total Borrowing	597.5	630.3	640.2	636.3	622.6	607.3

The authorised limit for external borrowing. A further key prudential indicator represents a control on the maximum level of borrowing. This represents a limit beyond which external borrowing is prohibited, and this limit needs to be set or revised by the full Council. It reflects the level of external borrowing which, while not desired, could be afforded in the short term, but is not sustainable in the longer term.

This is the statutory limit determined under section 3 (1) of the Local Government Act 2003. The Government retains an option to control either the total of all councils' plans, or those of a specific council, although this power has not yet been exercised.

The Council is asked to approve the following Authorised Limit:

Authorised Limit £m	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20
Total Borrowing	627.5	660.3	670.2	666.3	652.6	637.3

2: Treasury Management limits on activity

There are three debt related treasury activity limits. The purpose of these are to contain the activity of the treasury function within certain limits, thereby managing risk and reducing the impact of any adverse movement in interest rates. However, if these are set to be too restrictive they will impair the opportunities to reduce costs or improve performance. The indicators are:

- Upper limits on variable interest rate exposure. This identifies a maximum limit for variable interest rates based upon the debt position net of investments.
- Upper limits on fixed interest rate exposure. This is similar to the previous indicator and covers a maximum limit on fixed interest rates.
- Maturity structure of borrowing. These gross limits are set to reduce the Council's exposure to large fixed rate sums falling due for refinancing, and are required for upper and lower limits.

The interest rate exposure is calculated a percentage of net debt. The formula is shown below. Due to the mathematical calculation exposures could be greater than 100% of below zero (i.e. negative) depending on the component parts of the formula. The formula is shown below:

$$\frac{\text{Total fixed (or variable) rate exposure}}{\text{Total borrowing} - \text{total investments}}$$

Fixed rate calculation:

$$\frac{\text{Fixed rate borrowing} - \text{fixed rate investments}^*}{\text{Total borrowing} - \text{total investments}}$$

*defined as greater than 1 year to run

Variable rate calculation:

$$\frac{\text{Variable rate borrowing}^{**} - \text{fixed rate investments}^{**}}{\text{Total borrowing} - \text{total investments}}$$

**defined as less than 1 year to run to maturity, or in the case of LOBO borrowing, the call date falling within the next 12 months

£m	2015-16	2016-17	2017-18	2018-19	2019-20
Interest rate Exposures					
	Upper	Upper	Upper	Upper	Upper
Limits on fixed interest rates based on net debt	150%	150%	150%	150%	150%
Limits on variable interest rates based on net debt	65%	65%	65%	65%	65%

Maturity Structure of borrowing 2015-16		
	Lower	Upper
Under 12 months	0%	80%
12 months to 2 years	0%	50%
2 years to 5 years	0%	50%
5 years to 10 years	0%	50%
10 years and above	0%	100%

The Treasury Management Code of Practice Guidance notes require that maturity is determined by the earliest date on which the lender can require repayment, which in the case of LOBO loans is the next break point. This indicator represents the borrowing falling due in each period expressed as a percentage of total borrowing.

Affordability Prudential Indicators

The previous sections cover the overall capital and control of borrowing prudential indicators, but within this framework prudential indicators are required to assess the affordability of the capital investment plans. These provide an indication of the impact of the capital investment plans on the Council's overall finances. The Council is asked to approve the following indicators:

a) Actual and estimates of the ratio of financing costs to net revenue stream. This indicator identifies the trend in the cost of capital (borrowing and other long term obligation costs net of investment income) against the net revenue stream. The estimates of financing costs include current commitments and the proposals in this budget report.

This is calculated as the estimated net financing costs for the year divided by the amounts to be met from government grants and local tax payers.

%	2014-15 Projected	2015-16 Estimate	2016-17 Estimate	2017-18 Estimate	2018-19 Estimate	2019-20 Estimate
	9.21	10.23	11.68	12.04	12.24	11.85

b) Estimates of the incremental impact of capital investment decisions on Council Tax. This indicator identifies the revenue costs associated with proposed changes to the four year capital programme recommended in this budget report compared to the Council's existing approved commitments and current plans. The assumptions are based on the budget, but will invariably include some estimates, such as the level of Government support, which are not published over a four year period.

c) Incremental impact of capital investment decisions on the Band D Council Tax

£	2014-15 Projected	2015-16 Estimate	2016-17 Estimate	2017-18 Estimate	2018-19 Estimate	2019-20 Estimate
Council Tax - Band D	2.12	13.21	21.64	3.93	0.29	-3.59

Appendix 4: Minimum Revenue Provision Policy Statement

Policy statement

The Council is required to repay an element of the accumulated General Fund capital spend each year (the CFR) through a revenue charge (the Minimum Revenue Provision - MRP), although it is also allowed to undertake additional voluntary payments if required.

CLG Regulations have been issued which require the full Council to approve an MRP Statement in advance of each year. A variety of options are provided to councils, so long as there is a prudent provision. The Council is recommended to approve the following MRP Statement:

For capital expenditure incurred before 1 April 2008 or which in the future will be Supported Capital Expenditure, the MRP policy will be:

- **Existing practice** - MRP will follow the existing practice outlined in former CLG regulations (option 1).

This option provides for an approximate 4% reduction in the borrowing need (CFR) each year.

From 1 April 2008 for all unsupported borrowing (including PFI and finance leases) the MRP policy will be:

- **Asset Life Method** – MRP will be based on the estimated life of the assets, in accordance with the proposed regulations (this option must be applied for any expenditure capitalised under a Capitalisation Direction) (option 3).

This option provides for a reduction in the borrowing need over approximately the asset's life.

Appendix 5: Annual Investment Strategy

1: Investment policy

The Council's investment policy has regard to the CLG's Guidance on Local Government Investments ("the Guidance") and the 2011 revised CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes ("the CIPFA TM Code"). The Council's investment priorities will be security first, liquidity second, then return.

Investment instruments identified for use in the financial year are listed in section 8 under the 'Specified' and 'Non-Specified' Investments categories. Counterparty limits will be as set through the Council's Treasury Management Practices – Schedules.

2: Creditworthiness policy

This Council applies the creditworthiness service provided by Capita Asset Services. This service employs a sophisticated modelling approach utilising credit ratings from the three main credit rating agencies – Fitch; Moodys; and Standard & Poors. The credit ratings of counterparties are supplemented with the following overlays:

- Credit watches and credit outlooks from credit rating agencies.
- Credit Default Swap (CDS) spreads to give early warning of likely changes in credit ratings.
- Sovereign ratings to select counterparties from only the most creditworthy countries.

This modelling approach combines credit ratings, credit watches and credit outlooks in a weighted scoring system which is then combined with an overlay of CDS spreads for which the end product is a series of colour coded bands which indicate the relative creditworthiness of counterparties. These colour codes are used by the Council to determine the duration for investments. The Council will therefore use counterparties within the following durational bands provided they meet the minimum sovereign rating described in section 3:

- Yellow 5 years
- Purple 2 years
- Blue 1 year (only applies to nationalised or semi nationalised UK banks)
- Orange 1 year
- Red 6 months
- Green up to 100 days

- No Colour not to be used

The Capita Asset Services creditworthiness service uses a wider array of information than just primary ratings and by using a risk weighted scoring system, does not give undue preponderance to just one agency's ratings.

All credit ratings will be monitored daily. The Council is alerted to changes to ratings of all three agencies through its use of the Capita Asset Services creditworthiness service.

- If a downgrade results in the counterparty or investment scheme no longer meeting the Council's minimum criteria, its further use as a new investment will be withdrawn immediately.
- In addition to the use of credit ratings the Council will be advised of information in movements in Credit Default Swap against the iTraxx benchmark and other market data on a weekly basis. Extreme market movements may result in downgrade of an institution or removal from the Council's lending list.

Sole reliance will not be placed on the use of this external service. In addition this Council will also use market data and market information, information on government support for banks and the credit ratings of that government support.

The Chief Finance Officer has discretion during the year to lift or increase the restrictions on the counterparty list and or to adjust the associated lending limits on values and periods should it become necessary, to enable the effective management of risk in relation to its investments.

3: Sovereign Limits

Expectation of implicit sovereign support for banks and financial institutions in extraordinary situations has lessened considerably in the last couple of years, and alongside that, changes to banking regulations have focussed on improving the banking sectors resilience to financial and economic stress. The Council has therefore reviewed its previous policy of restricting overseas investments to counterparties in countries with a sovereign rating of AAA.

The Council has determined that for 2015-16 it will only use approved counterparties from countries with a sovereign credit rating from the three main ratings agencies that is equal to or above to that of the UK, currently AA+.

The list of countries that qualify using these credit criteria as at the date of this report are shown below. This list will be amended by officers should ratings change in accordance with this policy.

AAA	AA+
Australia	Finland
Canada	Hong Kong
Denmark	Netherlands
Germany	UK
Luxembourg	USA
Norway	
Singapore	
Sweden	
Switzerland	

4: Banking services

Barclays currently provide banking services for the Council. The Council will continue to use its own bankers for short term liquidity requirements if the credit rating of the institution falls below the minimum credit criteria set out in this report. A pragmatic approach will be adopted and monitored closely.

5: Investment position and use of Council's resources

The application of resources (capital receipts, reserves etc.) to either finance capital expenditure or other budget decisions to support the revenue budget will have an ongoing impact on investments unless resources are supplemented each year from new sources (asset sales etc.). Detailed below are estimates of the year end balances.

Year End Resources £m	2014-15 Projected	2015-16 Estimate	2016-17 Estimate	2017-18 Estimate	2018-19 Estimate	2019-20 Estimate
Fund balances/reserves	53.9	54.6	58.5	63.9	64.9	66.6
Provisions & other	28.1	23.1	23.1	23.1	23.1	21.6
Total core funds	82.0	77.7	81.6	87.0	88.0	88.2
Working capital surplus	70.5	69.7	69.9	70.1	70.3	70.5
Under/(over) borrowing	136.7	136.8	136.8	136.8	136.8	136.8
Expected investments	15.8	10.6	14.7	20.3	21.5	21.8

Investments will be made with reference to the core balance and cash flow requirements and the outlook for short term interest rates (i.e. rates for investments up to 12 months).

The Council is asked to approve the following treasury indicator and limit 'total principal funds invested for greater than 364 days'. These limits are set with regard to the Council's liquidity requirements and to reduce the need for early sale of an investment and are based on the availability of funds after each year end. This indicator is calculated by adding together all investments which have greater than 364 days to run to maturity at a single point in time. This is a change from the previous year in that monetary limits apply.

The Council is asked to approve the treasury indicator and limit:

Maximum principal sums invested > 364 days					
£m	2015-16	2016-17	2017-18	2018-19	2019-20
Principal sums invested > 364 days	16	11	15	20	22

For its cash flow generated balances, the Council will seek to utilise its business reserve accounts, notice accounts, money market funds and short dated deposits (overnight to three months) in order to benefit from the compounding of interest.

6: Specified investments

An investment is a specified investment if all of the following apply:

- The investment is denominated in sterling and any payments or repayments in respect of the investment are payable only in sterling.
- The investment is not a long term investment (i.e. up to 1 year).
- The making of the investment is not defined as capital expenditure by virtue of regulation 25(1)(d) of the Local Authorities (Capital Finance and Accounting) (England) Regulations 2003 [SI 3146 as amended].
- The investment is made with a body or in an investment scheme of high credit quality (see below) or with one of the following public-sector bodies:
 - The United Kingdom Government.
 - A local authority in England or Wales (as defined under section 23 of the 2003 Act) or a similar body in Scotland or Northern Ireland.
 - High credit quality is defined as a minimum credit rating as outlined in this strategy.

7: Non-specified investments

Non-specified investments are defined as those not meeting the above criteria.

Lending to third parties:

- The Council has the power to lend monies to third parties subject to a number of criteria. Any loans to or investments in third parties will be made under the Well Being powers of the Council conferred by section 2 of the Local Government Act 2000 or permitted under any other act.
- The Well Being power can be exercised for the benefit of some or all of the residents or visitors to a local authority's area. The power may also be used to benefit organisations and even an individual.
- Loans of this nature will be under exceptional circumstances and must be approved by General Purposes Committee.
- The primary aims of the Investment Strategy, in order of priority, are the security of its capital, liquidity of its capital and to obtain a return on its capital commensurate with levels of security and liquidity. These aims are crucial in determining whether to proceed with a potential loan.
- Recipients of this type of investment are unlikely to be a financial institution and therefore unlikely to be subject to a credit rating as outlined in the creditworthiness policy above. In order to ensure security of the Authority's capital, extensive

financial due diligence must be completed prior to any loan or investment being agreed. The Authority will use specialist advisors to complete financial checks to ascertain the creditworthiness of the third party. Where deemed necessary additional guarantees will be sought. This will be via security against assets and/or through guarantees from a parent company.

8: The use of specified and non-specified investments

Investment instruments identified for use in the financial year are as follows:

- The tables below set out the types of investments that fall into each category and the limits placed on each of these. A detailed list of each investment type is available in the Treasury Management Practices guidance notes.
- Maximum counterparty limits may be temporarily exceeded by small amounts and for very short periods where interest is added by the counterparty to the principal investment amount. In such instances the interest amounts will be withdrawn as soon as reasonably practicable.
- The counterparty limit with the Council's corporate bank (Barclays) may be breached on an overnight basis when cash surpluses are identified after the day's dealing position is closed. This occurs when the timing for receipt of funds is uncertain, for example the sale of a property. In such instances funds will be withdrawn as soon as reasonably practicable.

Criteria for specified investments:

Specified investments			
Investment	Minimum security / credit rating	Maximum amount	Maximum period
Debt Management Agency Deposit Facility (DMADF)	Government backed	No maximum	6 months
UK Treasury Bills	Government backed	No maximum	9 months
UK Local Authorities	Government backed	No maximum	1 year
Certificate of Deposit / Term Deposits (including callable deposits)	Purple	£20m individual/group	1 year
	Blue	£20m individual/group	1 year
	Orange	£20m individual/group	1 year
All colours are as per Capita			

Asset Service's matrix.	Red	£20m individual/group	6 months
	Green	£20m individual/group	100 days
	No colour	Not to be used	N/A
UK Government Gilts	Government backed	No maximum	1 year
Money Market Funds	AAA rated	£20m individual	Liquid
Bonds (multilateral development banks)	AAA	£20m	1 year

Criteria for non-specified investments:

Non-specified investments			
Investment	Minimum security / credit rating	Maximum amount	Maximum period
UK Government	Government backed	No maximum	5 years
UK Local Authorities	Government backed high security	No maximum	5 years
Certificate of Deposit / Term Deposits (including callable deposits) All colours are as per Capita Asset Service's matrix.	Yellow	£20m individual/group	5 years
	Purple		2 years
Property Funds Unit Trust	Considered on an individual basis	£20m	-
UK Government Gilts	Government backed	No maximum	5 years
Sovereign Issues	AAA or UK	£20m	5 years
Corporate Bonds Funds	Considered on an individual basis	£20m	-

UK Bonds	AAA / Government backed	£20m	5 years
Enhanced Money Market Funds	AAA variable net asset value	£20m	-
Bonds (multilateral)	AAA / Government backed	£20m	5 years
Equity	Considered on an individual basis	£20m	-

The Council may enter into forward agreements up to 3 months in advance of the investment commencing. If forward deposits are to be made, the forward period plus the deal period should not exceed the limits above.

9: Investments defined as capital expenditure

The acquisition of share capital or loan capital in any corporate body is defined as capital expenditure under Regulation 25(1) (d) of the Local Authorities (Capital Finance and Accounting) (England) Regulations 2003. Such investments will have to be funded from capital or revenue resources and will be classified as 'non-specified investments'.

Investments in "money market funds" which are collective investment schemes and bonds issued by "multilateral development banks" – both defined in SI 2004 No 534 – will not be treated as capital expenditure.

A loan or grant or financial assistance by this Council to another body for capital expenditure by that body will be treated as capital expenditure.

10: Provisions for credit related losses

If any of the Council's investments appear at risk of loss due to default (i.e. this is a credit related loss and not one resulting from a fall in price due to movements in interest rates) the Council will make revenue provision of an appropriate amount.

11: End of year investment report

At the end of the financial year, the Council will report on its investment activity as part of its Annual Treasury Report.

12: Pension fund cash

The Council will comply with the requirements of The Local Government Pension Scheme (Management and Investment of Funds) Regulations 2009, which were implemented on 1 January 2010. The Council will not pool pension fund cash with its own cash balances for investment purposes. Any investments made by the pension fund directly with this local authority will comply with the requirements of SI 2009 No 393.
