DfT Funding for Innovation – Vaisala Contribution

Dear Mr. Atkins,

Over the past 82 years Vaisala has earned a reputation for delivering innovative, reliable, best in class measurement technologies across a diverse range of industries. Our products, systems and services are used around the world, and are also deployed on NASA's Curiosity Rover (Mars exploration vehicle), and on the International Space Station.

In support of Cambridgeshire County Council's proposed application for funding for the above scheme in partnership with Vaisala, we can confirm that Vaisala will contribute to reducing the cost of our part of the project by providing a significant proportion of the resource required to deliver the project, up to the value of £10,000.00, at no cost to the project. This resource will be available for the development and verification of the Computer Vision solution in pursuance of the project goals, and is not transferrable to any other projects being undertaken by Cambridgeshire County Council, or any other third party in connection with this or any other project.

I trust this provides a clear demonstration of our commitment to the project, and of our ongoing commitment to providing thought leadership and innovation in the transport technology sector.

Yours faithfully,

Ben Brown

Sales Manager
